

Editor-in-Chief's Desk

Greetings to our Global Academic Community,

It is a privilege to welcome you to Vol. 04, Issue 01 (Jan–March 2026) of *Eduphoria — An International Multidisciplinary Magazine*. As we embark on this first quarter of the year, we find ourselves at a fascinating juncture in academic history, where the boundaries between traditional departments are blurring, giving way to a more holistic, interconnected pursuit of truth.

Fostering a Culture of Intellectual Curiosity

At *Eduphoria*, our mission has always been to provide a high-caliber platform for scholars who dare to look beyond the confines of their own specialization. In this issue, we continue to uphold the rigorous standards of a peer-reviewed and refereed publication. With every submission we receive, we aim to maintain the integrity of the ISSN 2960-0014, ensuring that the research we disseminate is not only innovative but also ethically sound and methodologically robust.

In This Issue: Bridging the Gap

The selection of articles in this volume reflects the diverse tapestry of modern research. From the socio-economic impacts of the digital revolution to the latest pedagogical shifts in global education, our contributors have provided a wealth of knowledge that is both timely and transformative.

"True academic progress is not measured by the depth of our silos, but by the strength of the bridges we build between them."

A Word of Gratitude

The publication of an issue of this scale is a collaborative triumph. I am deeply grateful to our Editorial Board and our dedicated Panel of Reviewers for their meticulous scrutiny and constructive feedback, which helps elevate the quality of every manuscript. To our authors, thank you for choosing *Eduphoria* as the home for your intellectual contributions. Your dedication to advancing human knowledge is what drives this magazine forward.

As you explore the insights within these pages, I hope they inspire you to challenge existing paradigms and foster new dialogues within your own professional and academic circles.

Keep Questioning, Keep Discovering.

Dr. Navneet Kaur
